Craniomaxillofacial

Leibinger

**Universal 2
Reference Guide**

In Pursuit of Perfection

We take the work seriously, for in the end, we help make a difference in people's lives.

Products embodying innovation and quality have been the foundation of the Stryker and the Leibinger reputations. To be successful, each product must not only provide a solution to the clinical need.

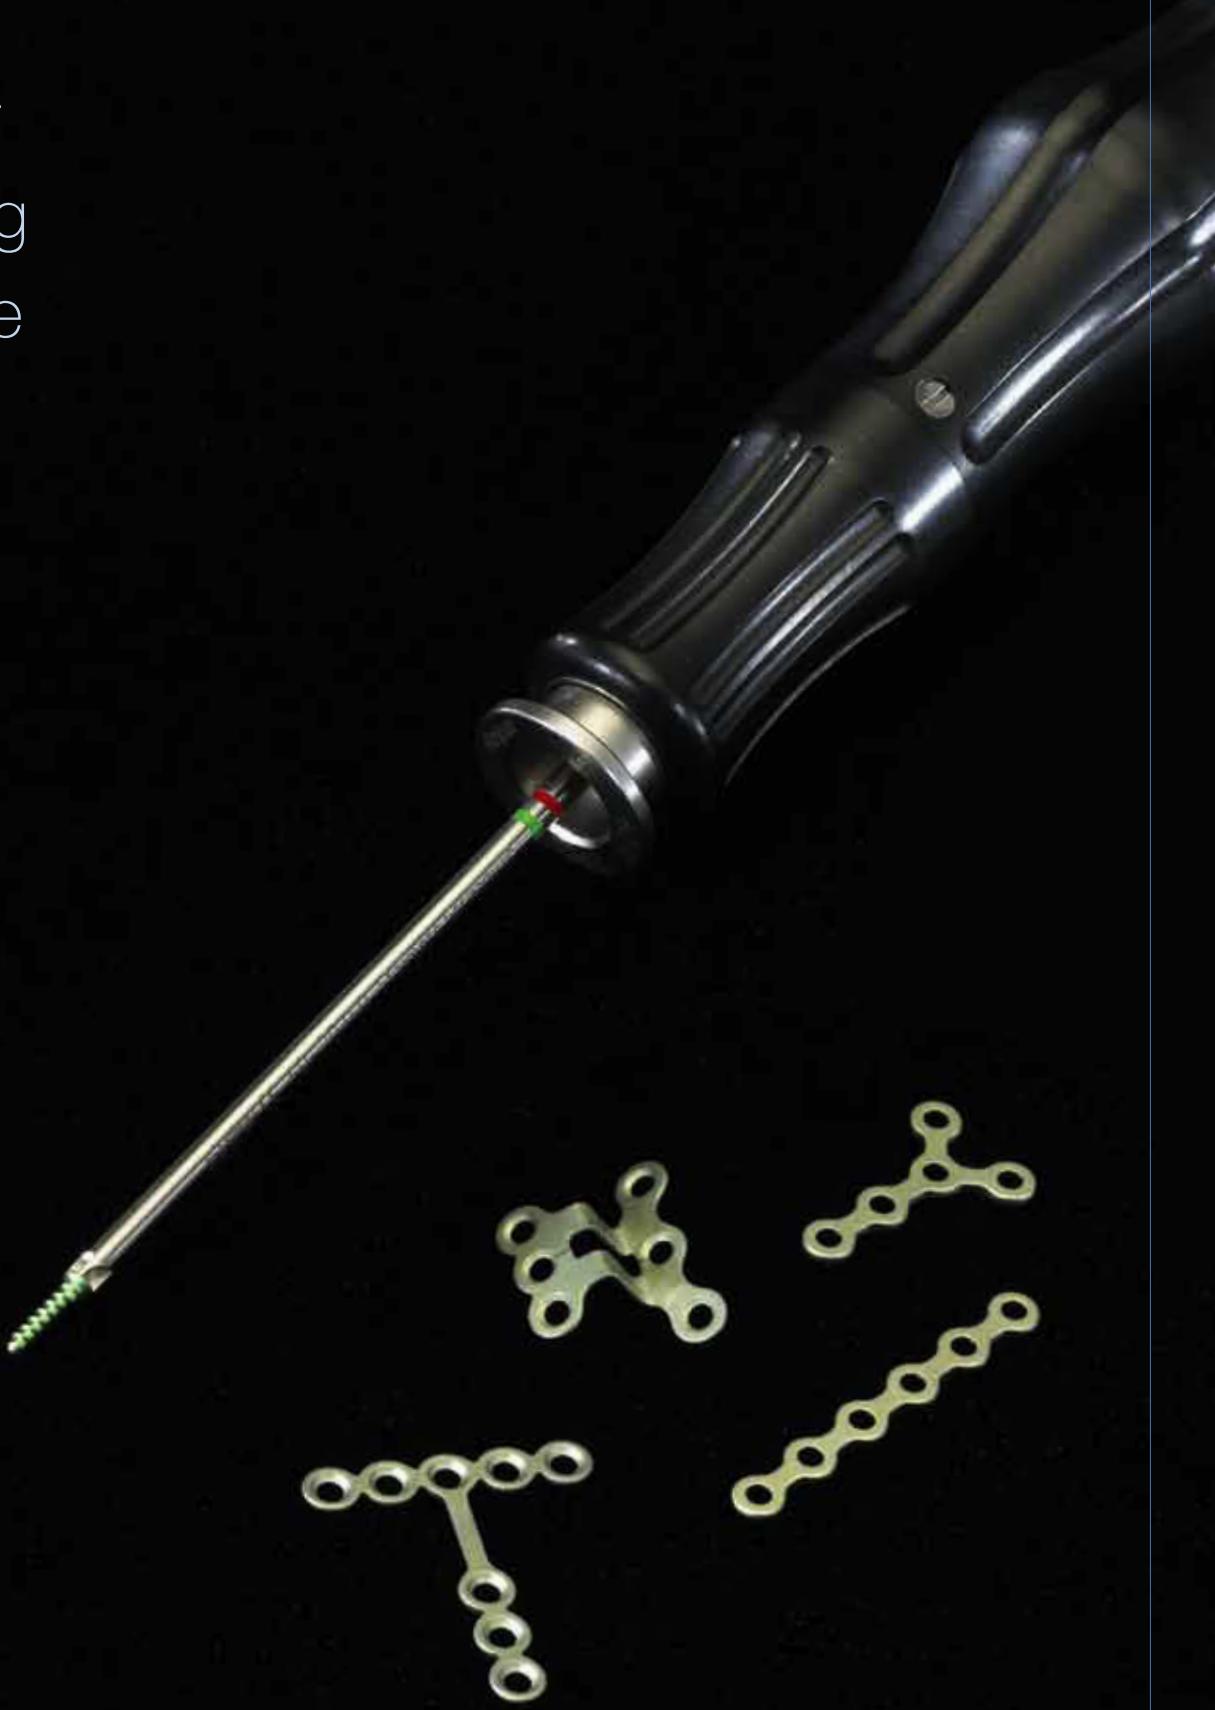

Stryker is one of the pre-eminent medical products and services companies in the world. Our focus is on the fundamentals and a relentless attention to detail of not only design and manufacture, but also of application and outcomes. The output of our work helps support the skills and talents of the medical profession. And because of this we set our standards high and work to surpass our own ambitious goals.

Since our inception, Stryker has developed products based on the expressed needs of leading practitioners. Our products are derived from a close working partnership with surgeons, physicians and healthcare experts from the entire spectrum of the healthcare field. That has been at the root of success for nearly eight decades and will help continue to foster success into the future.

Stryker Support for Continuing Education

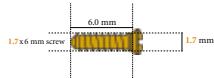

Stryker CMF is committed to furthering the science of craniomaxillofacial medicine by advancing medical knowledge. Everything we hope to achieve for patients relies on the skills and experience of the medical professionals who use our products. We believe it is our obligation to assist in furthering the understanding of CMF medicine among medical students, nurses, residents, and practicing surgeons.

Leibinger Universal 2

A Universal Concept For Craniomaxillofacial Surgery

The Leibinger Universal 2 System is a comprehensive Craniomaxillofacial plating system, which includes a wide selection of high quality implants for bone fixation for Craniomaxillofacial fractures, orthognathic and reconstructive surgery.

Due to its modular concept the balance between a comprehensive offering – traditionally requiring large and complex systems – and a solution for specific indications only, often compromising the options at hand, can more easily be achieved.

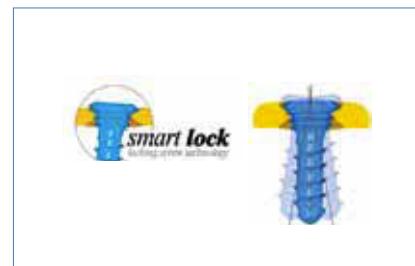

The modules themselves can be customized based on specific needs and preferences. Furthermore, the color-coding of modules and instruments allows for easy size recognition.

Universal Features

SmartLock Poly-Axial Locking Screw Technology

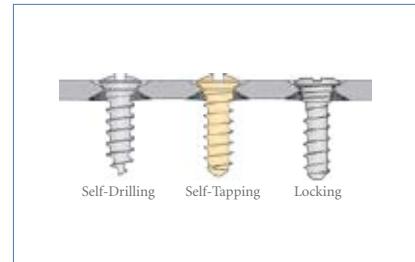

- Encourages a locked screw to plate interface, thereby reducing the risk of hardware related complications caused by loose screws*
- One-Step locking screws with a locking capability up to 10 degrees of angulation in every direction for Mid-Face and Mandible Locking Plates
- Polyaxial Drill Guides allow pilot holes to be drilled with an angulation of up to 10 degrees in every direction when used with Locking Plates

* Knott, P.D., et al. 'Evaluation of Hardware-Related Complications in Vascularized Bone Grafts with Locking Mandibular Reconstruction Plate Fixation'. Arch Otolaryngol Head Neck Surg. 2007 Dec; 133 (12): 1302-6.

Smart Implant Design

- SmartLock Technology accommodates fixation of plates with multiple screw designs, i.e. self-drilling, self-tapping or locking screws

Malleable Easy-to-Contour Plates

- These easy-to-contour Malleable Low Profile Plates can be used for the management of small bone fragments in non-load bearing regions of the skull
- Malleable Plates can be bent by hand

GSP Graduated Stability Plates

- The Graduated Stability Plates offer a progressive level of strength with increasing bar length
- The shorter plates used for limited advancements are malleable for ease of use
- The longer plates used for extensive advancements provide a rigidity required for stable fixation

Universal Cross-Pin Screw Head Design

- All neutral, self-drilling, locking and lag screws have the Cross-Pin head design which combines the potential advantages of:
 - Friction fit
 - Axial guidance
 - Torque transmission

SmartLoad Screw Delivery Fields

- The screw field design features a recessed screw hole that facilitates loading of the screw by guiding the tip of the screwdriver blade into the head of the screw
- Customizable screw length and screw type markers allow for storage of popular screw sizes and designs

The Leibinger Universal 2 Implant Modules

The Leibinger Universal 2 System represents the next generation of bone fixation for Craniomaxillofacial fractures, orthognathic and reconstructive needs.

1.2 mm Upper-Face Fixation Module

Applications

- Trauma
 - Cranial vault fractures
 - Orbital rim fractures
 - Frontal sinus fractures
 - Naso-orbital-ethmoidal fractures
- Reconstruction of bony defects and deformities
 - Cranial vault
 - Bone graft fixation
 - Orbital region
 - Zygomatic region
 - Dento-alveolar region

Features

- Malleable Low Profile plates (blue) for Micro applications, easy to adapt by hand
- Standard plates (gold) offer slightly more stability
- Choice of 1.2mm self-drilling and self-tapping screws

1.7 mm Mid-Face Fixation Module

Applications

- Trauma
 - Le Fort I, II, III fractures
 - Zygomatic fractures
 - Naso-orbital-ethmoidal fractures
 - Cranial vault trauma
- Reconstruction of bony defects and deformities
 - Le Fort I, II, III levels
 - Maxilla
 - Orbital region
 - Zygomatic complex
 - Cranial vault

Features

- Comprehensive selection of Malleable (blue) and Standard (gold) plates
- Mid-Face locking plates (grey) that accommodate all 1.7mm screws
- Choice of 1.7mm self-drilling, self-tapping and locking screws
- Universal screwdriver for all 1.7mm and 1.2mm screws

2.0 mm MP Mini Plating Module

Applications

- Craniofacial fractures
- Orthognathics Mid-face /Mandible
- Genioplasty fixation
- Sagittal split osteotomy fixation

Features

- Comprehensive selection of Würzburg and Steinhäuser type plates
- Choice of 2.0mm MP self-drilling and self-tapping screws
- Implant module is available in both full and half sizes

1.7/2.0/2.3 mm Orthognathic Fixation Module

Applications

- 1.7mm Indications
 - Le Fort I, II, III osteotomy fixation
 - Genioplasty fixation
 - Dento-alveolar osteotomy fixation
 - Bone graft fixation
- 2.0/2.3 mm Indications
 - Sagittal split osteotomy fixation

Features 1.7mm

- Four different L-plate types:
Standard (gold), Malleable (blue),
GSP (gold, marked "G") and
Locking (grey)
- Pre-bent maxillary advancement plates
- Choice of 1.7mm self-drilling,
self-tapping and locking screws

Features 2.0/2.3mm

- Sagittal split osteotomy plates to be used with locking or neutral screws
- Dedicated orthognathic trocar system

2.0/2.3 mm Mandible Fixation Module

Applications

- 2.0mm Mini Plate Indications
 - Mandibular fracture osteosynthesis
 - Sagittal split osteotomy fixation
- 2.0/2.3mm Fracture Plate Indications
 - Simple, multiple, oblique and comminuted fractures of:
 - Symphysis and parasymphysis
 - Mandibular body
 - Mandibular angle

Features

- Half size module for low profile Mini and 3-D plates (blue) as well as Fracture and Compression plates (gold)
- Mini and Mandible fracture plates are compatible with the multidirectional locking and neutral screws
- Universal screwdriver for 2.0 and 2.3mm screws

The Leibinger Universal 2 Implant Modules

2.0/2.3mm Mandible Fracture Module

Applications

- 2.0mm Mini Plate Indications
 - Mandibular fracture osteosynthesis
 - Sagittal split osteotomy fixation
- 2.0/2.3mm Fracture Plate Indications
 - Simple, multiple, oblique and comminuted fractures of:
 - Symphysis and parasympysis
 - Mandibular body
 - Mandibular angle

Features

- Full size module for low profile Mini and 3-D plates (blue) as well as Fracture and Compression plates (gold)
- Fracture plates (gold) have laser etchings across top of the plate to aid in top/bottom orientation
- Mini and Mandible Fracture plates are compatible with the multidirectional locking and neutral screws
- Universal screwdriver for 2.0 and 2.3mm screws
- MMF self-drilling screws available

2.0/2.3mm Mandibular Reconstruction Module

Applications

- Primary Recon Plate Indications
 - Fixation of microvascular grafts in a single step reconstruction after resection
 - Comminuted mandibular fracture fixation
- Recon Plate Indications
 - Continuity defect bridging after resection of a tumor, osteomyelitis or osteoradionecrosis and the fixation of microvascular or non-vascularised grafts in a primary reconstruction
 - Continuity defect bridging prior to secondary reconstruction
 - Fixation of comminuted mandibular fractures or defects associated with severe trauma

Features

- One single screw head design for all screw diameters 2.0, 2.3 and 2.7mm
- Plates accommodate multiple screw diameters and designs
- Pre-contoured reconstruction plates
- Dedicated low profile plates for primary reconstruction

2.0 mm Lag Screw Module

Applications

- 2.0mm diameter screws available in 30, 33, 36, 39 and 42mm lengths for lag screw fixation of mandibular and condylar fractures and osteotomies

Features

- Instrumentation for lag screw technique included

2.0 mm MMF Self-Drilling Screw Module

Applications

- Temporary maxillomandibular fixation providing indirect stabilization of fractures of the maxilla, mandible or both where there is sufficient occlusion

Features

- Stainless steel screw design
- Head design for securing wires or elastics
- Self-drilling for one-step insertion

Skeletal Anchorage

Applications

- Intrusion/Extrusion of teeth
- Distal/mesial movement
- Space closure
- 3-D control of teeth

Features

- Bone anchored versus tooth anchored system
- Self-drilling and self-tapping anchor screws
- Locking anchor plates for wire fixation
- Standard anchor plates

The Color Coding System

The color coding of the screw diameter

Sagittal Split Drill Bits

Sagittal Split Drill Bits for 2.0/2.3mm Screws

illustrated scale 1:1

Non-Sterile	for Screw Length	Diameter	Total Length	Shaft End
60-16820	10 to 20mm	1.6mm	102mm	Stryker
60-16720	10 to 20mm	1.6mm	102mm	Dental
60-19820	10 to 20mm	1.9mm	102mm	Stryker
60-19720	10 to 20mm	1.9mm	102mm	Dental

Use of the Sagittal Split Drill Bits

The color scale on the shaft of the drill indicates the required length of screw. The length measurement corresponds to the color on the drill as it passes through the proximal end of the canula of the trocar handle, e.g.:

green = 10mm, **yellow** = 12mm, **red** = 14mm, black = 16mm, **orange** = 18mm, white = 20mm

The color code scale is explained on the Orthognathic module, on the lid of the Mandibular Fracture and Mandibular Fixation modules and on the Screw length measuring block 62-18500.

50-27520	2.7 x 20mm

Indications Reconstruction Plates

Primary recon plates (color-coded gold):

Are indicated:

1. For the fixation of microvascular grafts only (eg. fibula, radius, scapula, iliac crest) in a single-step reconstruction after resection of a tumor, osteomyelitis or osteonecrosis
2. For the internal fixation of comminuted mandibular fractures

Recon plates (color-coded silver):

Are indicated:

1. For bridging continuity defects after resection of a tumor, osteomyelitis, or osteoradionecrosis and the fixation of:
 - microvascular grafts in a primary reconstruction
 - non-vascularised grafts in a primary reconstruction
2. For bridging a continuity defect prior to secondary reconstruction
3. For the internal fixation of comminuted mandibular fractures or defects associated with gunshot wounds and other severe trauma

Mandible Reconstruction Plates

All reconstruction plates accept both locking and neutral screws and all screw diameters 2.0, 2.3 and 2.7 mm.
2.0 mm screws should only be used for fixation of bone grafts.

A template is included in each package of all available mandibular reconstruction plates.

Changing of Screw length markers

The implant modules are equipped with exchangeable screw length markers for individual configuration.

The screw length markers can be changed using a round object (e.g. backside of a screwdriver blade) by pushing from below through the implant module.

A surgeon must always rely on his or her own professional clinical judgment when deciding whether to use a particular product when treating a particular patient. Stryker does not dispense medical advice and recommends that surgeons be trained in the use of any particular product before using it in surgery. The information presented is intended to demonstrate the breadth of Stryker product offerings. A surgeon must always refer to the package insert, product label and/or instructions for use before using any Stryker product. Products may not be available in all markets because product availability is subject to the regulatory and/or medical practices in individual markets. Please contact your Stryker representative if you have questions about the availability of Stryker products in your area.

Stryker Corporation or its divisions or other corporate affiliated entities own, use or have applied for the following trademarks or service marks: **Leibinger, Stryker**. All other trademarks are trademarks of their respective owners or holders.
